

Market commentary

Global share markets extended their rally through the September quarter, supported by widespread interest rate cuts and optimism around artificial intelligence. The US share market led the charge, recording its strongest September in 15 years. This led to a robust 8.1% gain for the quarter. European markets were more subdued, weighed down by political uncertainty and trade tensions, while Australian shares rose solidly with the Reserve Bank of Australia cutting interest rates.

The Reserve Bank of NZ (RBNZ) lowered the Official Cash Rate (OCR) to 3.0% in August. However, it was a weak GDP growth number that saw the RBNZ take decisive action in October, cutting the OCR by 0.50%, down to 2.5%. Further easing is expected. Despite the sluggish backdrop, the New Zealand share market delivered a healthy 5.5% gain, buoyed by lower rates and investor confidence.

All returns are in local currency terms unless stated.

Fund performance

Past year

Annual return (after deductions for charges and a PIR tax rate of 28%)	10.16%
Annual return (after deductions for charges but before tax)	11.28%
Market index annual return* (reflects no deduction for charges and tax)	12.08%

*The market index comprises the benchmark index returns of each of the asset classes weighted by their benchmark asset allocations. Refer to the SIPO for more information on the market index for this Fund.

Key fund facts

Objective: The Balanced Fund aims to provide a medium level of return over the medium to long term. It is suitable for investors who are prepared to accept a medium level of risk.

Description: The Balanced Fund is an internationally diversified fund that mainly invests in growth assets (e.g. shares) with a moderate allocation to income assets (e.g. bonds).

*Because the fund has been operating for fewer than 5 years, the risk indicator is calculated using market index returns for the period of 1 April 2020 - 31 March 2024 and actual fund returns for the period 1 April 2024 - 30 September 2025. As a result, the risk indicator may provide a less reliable indication of the potential future volatility of the fund.
