MAS KiwiSaver Scheme
Moderate Fund
Monthly Fund Fact Sheet as at 30 June 2026

Market commentary

Global equity markets delivered mixed results in June, with European and domestic shares performing relatively well, while returns in the US were more subdued. While the US share market took a breather over June, it still recorded its strongest quarterly gain since late 2020. Investor sentiment improved as tensions in the Middle East eased, helping to lower oil prices. Market leadership broadened beyond technology, with investors rotating into Financials, Industrials and defensive sectors such as Health Care. While enthusiasm for AI remains strong, attention is shifting towards the sustainability of AI-related spending and earnings growth.

NZ bond yields generally declined through June, fluctuating as investors weighed ongoing global uncertainty and upcoming interest rate decisions. Falling oil prices and reduced geopolitical risks helped ease inflation concerns. For income-focused investors, yields remain attractive by recent standards.

All returns are in local currency terms unless stated.
