

# MAS KiwiSaver Scheme Moderate Fund

Monthly Fund Fact Sheet as at 28 February 2026

## Market commentary

Global share markets rose in February, although performance varied across regions. Investors shifted away from US technology companies amid concerns about AI-related disruption, with stronger gains seen in markets such as Japan and Europe. Defensive sectors like Utilities and Consumer Staples performed well during a period of higher volatility, while Energy and Materials benefited from rising commodity prices and geopolitical tensions. Despite softness in some US technology names, overall company earnings remained solid, helping support equity market performance through the month. The beginning of March saw the escalation of conflict in the Middle East, which has seen share markets come off month-to-date

In February 2026, the new Reserve Bank Governor, Dr Breman, oversaw her first Official Cash Rate (OCR) decision. As expected, the Committee left the OCR unchanged at 2.25%, with “policy likely to remain accommodative for some time”. While acknowledging recent improvement, it was noted that the economic recovery was at an “early stage”. Notably, the Committee was “confident” that inflation would return to the target midpoint over the next 12 months.

All returns are in local currency terms unless stated.
