

Market commentary

NZ interest rates followed global trends through May, rising earlier before easing in the back half of the month. The 10-year NZ Government bond yield ended around 4.5%. The OCR was left unchanged, though the decision appeared finely balanced, with some committee members favouring hikes. This keeps upward pressure in play. For cash portfolios and income assets, current yields remain supportive, though uncertainty around inflation and policy timing continues to drive variability across the curve.

All returns are in local currency terms unless stated.

*Because the fund has been operating for fewer than 5 years, the risk indicator is calculated using market index returns for the period of 1 June 2021 - 31 March 2024 and actual fund returns for the period 1 April 2024 – 31 May 2026. As a result, the risk indicator may provide a less reliable indication of the potential future volatility of the fund.
